

## **Endurant Energy | Marketing and Development/Analytics Internship**

Endurant Energy, an LS Power portfolio company, aims to be the leading developer of sustainable on-site energy infrastructure solutions in North America. We are seeking internship applicants.

Endurant Energy is headquartered in Chicago, IL with offices in Beverly Hills, CA, and New York City, NY. The internship may be based out of any of our locations. The length of the internship is negotiable up to 12 months.

Using the latest sustainable technologies, world-class engineering, and outstanding execution, Endurant Energy helps customers to produce reliable, resilient, clean, and cost-effective Energy. We also own the assets that we develop. The 'design-build-own-operate-maintain' business model ('Energy-as-a-Service') is core to our offering. This position offers a great overview of all aspects of a rapidly expanding business at the cutting edge of the clean energy sector.

Endurant Energy seeks to expand the group through the addition of talented, driven individuals. Our core team is composed of independent thinkers who collaborate to develop viable solutions to energy challenges, creating the future of sustainable energy. The intern will work across the Marketing, Analytics, and Development departments to support the group to develop holistic, district-scale projects. We seek to add an intellectually curious junior member. They must be highly willing to learn and take a proactive approach to problem solving. They must be enthusiastic about working on every aspect of Endurant Energy's business, from website management to Energy modelling to research on cities' energy policies.

The intern will begin working on marketing activities to develop their knowledge and understanding of the business which will enable them to progress to the analytics department.

### **Intern Job Description**

The Intern will:

- start by learning about the technologies we work with: CHP, Energy storage, geothermal heat exchange, Solar PV, and microgrid automation and controls;
- support the Marketing function by writing case studies, arranging Conference abstract submissions and logistics, taking responsibility for social media updates (Twitter, LinkedIn) and keeping the website updated;
- spend time with the Analytics department to:
  - model the financial/business case for distributed energy resource (DER) solutions particularly in commercial, industrial, and institutional applications
  - undertake incentive research, summarizing new/emerging incentives for geothermal and on-site energy technologies (specifically in New York, California, and Chicago)
  - perform tariff/economic analysis.
- assist the business development team with reports and research on potential customers;

- be asked to maintain a current understanding of emerging trends in energy markets and improvements in commercial technologies, to share information with the wider team;
- support writing of reports for existing clients by an experienced team member, with the goal of progressing to undertaking client projects more independently, with appropriate supervision and guidance.

#### Useful Hard Skills

- Strong MS suite skills (especially Excel but also Word and PowerPoint) and knowledge of Adobe Creative Cloud (InDesign) preferred but not vital
- Strong written and verbal communication skills
- Any Excel financial modelling experience or programming experience a plus

#### Desired Soft Skills

- Proactive approach to problem solving
- Willingness to listen, learn, and take initiative
- Demonstrated excellent attention to detail
- Ability to work in small teams within a fast-paced environment
- Confidence to work independently with support, openness to feedback and coaching, unafraid of requesting support where required
- Interest in sustainable or renewable energy technology and/or policy
- An eye for design appreciated
- Good time management skills and an ability to prioritize effectively

This is a salaried position.

Endurant Energy is a proponent of Equal Employment Opportunities, and values diversity. We encourage all qualified candidates to apply.

Paid vacation days will be in line with standard Endurant Energy employee benefits.
